

JASON DAIRY PROJECT WEBSITE

DOCUMENTATION

The website specifically describes a dairy project that deals in supplying dairy products eg milk, ghee, powdered milk, yoghurt and other dairy products

I used vs code as the software of designing my website

Html as the text editor and css

The website has four pages

Home page

Aboutus page

Contact us page

Products offered page

Styling I used both internal and external styling

Internal in the aboutus, contactus and products offered pages

And external styling on the index.css
